

**Radio Amica**  
**Oc 7550 Khz amplitude**  
**modulation**  
**Tx on Friday evening,**  
**Saturday and Sunday**

Bologna 22/08/2009

Dear Mr Achim Brückner

My name is Michele and am the designer and engineer radio Amica.

Thank you infinitely on behalf of the entire staff of the radio this your Report audience can confirm the 100%.

Radio Amica was born a few months and currently is still producing a few programs, often repeats the programs of "Radio Antenna Verde."

Amica radio normally transmits only on Friday evenings, Saturdays, and Sundays, but are frequent especially now testing days and different times.

The radio consists of a transmitter self built by 1kw carrier and the antenna is inverted v dipole positioned at about 18mt in height.

I apologize for this QSL in electronic form but at least for now direct our forces to the technical improvements that radio calls.

Michele.

**technical information:**  
**transmitter carrier power 1kW**  
**Antenna : Dipole ½ wave inverted v**
